ABOUT ME

Computer Systems Engineering student focused on full-stack web development and machine learning. Experienced in building and deploying modern web applications using React, TypeScript, Python, and cloud platforms. Passionate about scalable systems, UI/UX, and practical problem-solving through software.

EDUCATION

Bachelor of Engineering – Computer Systems Engineering
Mehran University of Engineering and Technology (MUET)

Aug 2024 – Present

EXPERIENCE

Content Creator | D3 Digital Dream Dynamo | Oct 2024 – Jan 2025

- Orchestrated end-to-end video campaign coordination from concept through post-production delivery.
- Developed and executed creative content strategy driving digital engagement across multiple platforms.

Video & Audio Editor | Muet Fm 92.6 | Aug 2024 – Jan 2025

- Managed post-production workflows for university radio broadcasts and digital channels.
- Edited high-quality promotional video content and mixed professional audio feeds for social media distribution.

Head Director of Videography | Hult Prize MUET SZAB | Jan 2025 – Mar 2025

- Directed media production planning and execution for international entrepreneurship event.
- Coordinated recording, planning, and post-production across teams.

Volunteer | PEF Soft Skills Training Program | Mar 2025

- Supported event coordination and participant engagement for professional development sessions.

Volunteer | 1st International Conference on Innovations in Information and Communication Technologies (IICT'26)

- Assisted during a hands-on CI/CD workshop focused on building end-to-end DevOps pipelines from code to cloud.
- Contributed to event operations, participant management, and workshop facilitation.

TECHNICAL SKILLS

Programming Languages:

Python, Java, C++, JavaScript, TypeScript, SQL, Dart (Basic)

Frontend Development:

React 18, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, State Management (Zustand)

Backend & Full-Stack:

REST APIs, Node.js, PostgreSQL, Supabase, Database Design, Authentication (Supabase Auth), Deployment (Vercel)

Data Science & Machine Learning:

Python (Pandas, NumPy, Scikit-learn), Linear Regression, Gradient Descent, Data Cleaning & Preprocessing | Data Visualization | Model Evaluation

Tools & Technologies:

Git & GitHub, VS Code, Vercel, Supabase Console, Tableau, Microsoft Excel

SOFT SKILLS

Problem-Solving | Leadership | Team Collaboration | Event Coordination | Communication

PROJECTS

Smarter - Attendance Management System | Full-Stack | [GitHub](#) | [Live](#)

- Built full-stack attendance app for 100+ students with React, TypeScript, and Supabase Auth
- Implemented AI-powered OCR for extracting student lists and multi-format export (PDF, PNG, CSV, TXT)
- Designed semantic CSS system with Dark Mode toggle and state management using Zustand
- Deployed to Vercel with automated GitHub integration

Parho Sain - Exam Preparation Platform | Full-Stack Web Application | [Live](#)

- Built and deployed full-stack exam prep platform for Pakistani university entrance exams
- Engineered secure authentication with CSRF protection and session device-locking
- Implemented timed mock tests, subject-wise practice, and admin payment verification panel
- Integrated Cloudinary for payment uploads and deployed on DigitalOcean with Nginx + PHP-FPM
- Applied enterprise security: prepared SQL statements, security headers, and hardened access rules

Cs Batch Results - University Results Dashboard | [Live](#)

- Built interactive web dashboard for viewing and tracking CS batch academic results
- Implemented responsive UI with HTML, CSS, and JavaScript for seamless student access
- Deployed to Vercel for instant accessibility across devices

Rickshaw Fare Prediction – Machine Learning Project | [GitHub](#) | [Live](#)

- Developed a Linear Regression model from scratch using Python and Gradient Descent
- Collected real-world transportation fare data through Google Forms
- Cleaned, processed, and analyzed raw datasets for model training
- Visualized cost function behavior and tested multiple learning rates
- Deployed working model using Vercel

Lottery App (Flutter / Dart)

- Developed UI-based random number generator application
- Applied responsive design and basic state management

ACHIEVEMENTS & CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Supervised Machine Learning: Regression and Classification – DeepLearning.AI, Stanford University
- AI Seekho Season 6 – Tier 2 Recognition (60+ labs, 16 courses, 16 badges)
