## ABOUT ME

---

Computer Systems Engineering undergraduate passionate about Data Analytics, Machine Learning, and problem-solving using real-world data. Skilled in Python, Java, C++, data cleaning, and analytical thinking with hands-on experience building machine learning projects using self-collected datasets. Familiar with Linear Regression, Gradient Descent, and data preprocessing techniques. Strong team collaborator with leadership and event coordination experience. Seeking opportunities to apply analytical and technical skills in practical environments.

## EDUCATION

---

**Bachelor of Engineering – Computer Systems Engineering**  
Mehran University of Engineering and Technology (MUET)

Aug 2024 – Present

## EXPERIENCE

---

**Head Director of Videography** | Hult Prize MUET SZAB | Jan 2025 – Mar 2025

- Directed media production planning and execution for international entrepreneurship event.
- Coordinated recording, planning, and post-production across teams.

**Volunteer** | PEF Soft Skills Training Program | Mar 2025

- Supported event coordination and participant engagement for professional development sessions.

**Volunteer** | 1st International Conference on Innovations in Information and Communication Technologies (IICT'26)

- Assisted during a hands-on CI/CD workshop focused on building end-to-end DevOps pipelines from code to cloud.
- Contributed to event operations, participant management, and workshop facilitation.

## TECHNICAL SKILLS

---

### Programming Languages:

Python, Java, C++, SQL, Dart (Basic)

### Data Analytics & Machine Learning:

Data Cleaning, Data Visualization, Data Preprocessing, Linear Regression, Gradient Descent

### Tools & Technologies:

Git, GitHub, VS Code, Vercel, Tableau, Microsoft Excel

### Currently Learning:

Advanced Data Analytics, Artificial Intelligence Fundamentals

## SOFT SKILLS

---

Problem Solving | Leadership | Team Collaboration | Event Coordination

## PROJECTS

---

### **Rickshaw Fare Prediction – Machine Learning Project** | [GitHub](#) | [Live Demo](#)

- Developed a Linear Regression model from scratch using Python and Gradient Descent
- Collected real-world transportation fare data through Google Forms
- Cleaned, processed, and analyzed raw datasets for model training
- Visualized cost function behavior and tested multiple learning rates
- Deployed working model using Vercel

### **Secure Digital Notebook (C++)**

- Designed encrypted note management system with password protection
- Implemented search, tagging, and undo/redo functionality
- Applied OOP design and file handling concepts

### **Lottery App (Flutter / Dart)**

- Developed UI-based random number generator application
- Applied responsive design and basic state management

## ACHIEVEMENTS & CERTIFICATIONS

---

- Google Data Analytics Professional Certificate
- Supervised Machine Learning: Regression and Classification – DeepLearning.AI, Stanford University
- Introduction to Artificial Intelligence Certification
- AI Seekho Season 6 – Tier 2 Recognition
- 10x Growth Series Achievement Certificate
